

Barnaamijka Tallaalka Dugsiga Sare ee Meningococcal ACWY

Soo-dhamaystir oo dugsiga usoo-celi

1. Aqri macluumaadka Meningococcal ACWY
2. Buuxi qaybta ogolaanshaha oo saxiix haddii Haa tahay
3. Soo-goo foomka ogolaanshaha una soo-celi dugsiga xataa haddii aadan doonayn in ilmahaaga la tallaalo. KaLa xiriir guddiga degmadaada wixii macluumaad dheraad ah.

Macluumaadka Meningococcal ACWY

Meningococcal ACWY

Cudurka Meningococcal waa infakshan bakteeriyo dhaliso. Inkastoo Cudurka Meningococcal uusan caadi ahayn, waxay noqon kartaa wax halis ah, si dhaqso ah. Qiyaastii boqolkiiba 10 qof ayaa ku qaadaan dhuuntooda bakteeriyada meningococcal ayagoon ku xanuunsan. Dadkaas waxaa loo yaqaan 'qaadeyaal'. Bakteeriyada meningococcal waxaa laysagu gudbiyaan qof ilaa qof taas oo ku dhacda xiriir joogto ah, xidhan, guri wada-joogid iyo galmo. Qaangaaradu waxay ugu jiraan halis weyn cudurka meningococcal waxay u badan tahay inay cudurka dadka kale u gudbiyaan.

Cudurka meningococcal meningococcal weerarka ah wuxuu yimaadaa markii bakteeriyadu ay gasho socodka dhiigga si u dhaliso septicaemia (infagshan dhiigga gala oo loo yaqaan 'bacteraemia') ama meningitis, (bararka dahaarka daboola maskaxda). Dhimasho ayaa dhici karta boqolkiiba 10 kaysaska. Marmarna, infagshan daran ayaa kaloo ku dhaca kalagoosyada, dhuunta, sanbabada ama xiidmaha.

Waxaa jira noocyo kala duwan (serogroups) ee bakteeriyada meningococcal oo xarfaha alfabeetada loo yaqaan, oo ay ka mid yihiin meningococcal A, B, C, W iyo Y. Sannadihii dhawaa qaar ka mid ah noocyada meningococcal meningococcal ayaa Australia ku soo batay.

Tallaalka uu ku jiro Meningococcal ACWY

Tallaalka uu ku jiro Meningococcal ACWY waa afartiiba hal tallaalka laysku geeyey ee looga hortago noocyada meningococcal A, C, W, iyo Y. daraasaduhu waxay muujiyeen firfircoonida tallaalka meningococcal A, C, W, iyo Y inay u dhaxeeyso boqolkiiba 80 ilaa 85 qaangaarada. Barnaamijka tallaalka meningococcal A, C, W, iyo Y waxaa lagu hirgeliyey qaangaarada UK ilaa 2015kii, waxaana lagu tashey US ilaa 2005kii.

Tallaalka kuma jirto wax bakteeriyo nool ah mana keeni karto cudurka meningococcal. Noocyada ACWY ee tallaalka wuxuu xoojinayaa qaangaarada qaba nooca C oo ilaa cunugnimadii ay qabeen waxuuna ka ilaalinayaa noocyada A iyo Y.

Saamaynta aan lagu talo-gelin ee Tallaalka meningococcal ACWY

Badiba saamaynta aan lagu talo-gelin waa kuwo hooseeya si dhaqso ahna way u baaba'aan. Haddii falcelisyada soo-socdaa dhacaan, waxay si dhaqso ah u noqonayaan tallaalka ka dib.

Saamaynta aan lagu talagalinn:

- Heerkul meel-dhexaad ah
- Madax-wareer
- Dawakhaad
- Xanuun, casaan iyo bararka bartii la durey
- Diidid ayaa dhacda ilaa 30 daqiiqo ka dib tallaalkii.

**Adeegga fasiraadda
iyo turjumidda
ka wac 131 450**

IMMUNISE
AUSTRALIA PROGRAM
An Australian, State and Territory
Governments initiative

Haddii falcelis meel-dhexaad ah uu dhaco, saamaynta aan lagu talo-gelin waxaa agu yareyn karaa:

- Ayadoo la cabbo dureere badan iyo ayadoon dhar badan laysa-saarin haddii qofka ay hayso xummad
- Ayadoo la qaato paracetamol lana saaro maro qabow, oo qoyan bartii la urye.

Saamaynaha aan lagu tala-gelin aadka u dhifka ah

- Falceliska aleerjikada ah ee daran

Markuu jiro falceliska aleerjikada ah ee daran, feejignaan daawo oo degdeg ah ayaa la siin doonaa. Haddii falcelisyadu ay daran yihiin, ama haddii aad ka walwalsan tahay, la xiriiir dhaqtarkaaga ama isbitaalkaaga.

Liiska-hubinta ee tallaalka kahor

Kahor intaan ilmahaaga la tallaalin, usheeg dhaqtarkaaga ama kalkaaliyhaaga haddii wax ka mid ah waxyaalahan ay khuseeyaan.

- Uu xanuunsan yahay malinta tallaalka (heerkulkiisu ka sarreeyo 38.5°C)

- Uu qabo aleerjiko daran
- Uu qabo falcelis daran ee xagga tallaalka ah
- Ay uur leedahay

Kadib tallaalka ku su meesha tallaalka ugu yaraan 15 daqiiqo.

Macluumaad dheeraad ah

Haddii aad u baahan tahay talooyin ama macluumaad, fadlan la xiriiir adeegga tallaalka dowladdaada hoose ama dhaqtarka degaankaaga. am aka eeg www.betterhealth.vic.gov.au

Sida loo soo buuxiyo foomka

Meningococcal ACWY Secondary School Vaccine Program

Complete and return to school

1. Read the Meningococcal ACWY information.
 2. Complete the consent section and sign if a Yes.
 3. Remove the consent form and return it to school even if you do not want your child to be vaccinated.
- Contact your local council for more information.

Meningococcal ACWY information

Meningococcal ACWY

Meningococcal disease is caused by bacteria. Although meningococcal disease is uncommon, it can become very serious, very quickly. About 10 per cent of people carry meningococcal bacteria in their throat without becoming unwell. These people are known as 'carriers'. Meningococcal bacteria are passed from person to person by regular, close, prolonged household and intimate contact. Adolescents are at increased risk of meningococcal disease and more likely to spread the disease to others.

Invasive meningococcal disease occurs when these bacteria enter the blood stream to cause septicaemia (infection in the blood, also known as 'bacteraemia') or meningitis, (inflammation of the membrane covering of the brain). Death can occur in up to 10 per cent of cases. Occasionally, severe infection can also occur in the joints, throat, lungs or intestines.

There are different strains (serogroups) of meningococcal bacteria known by letters of the alphabet, including meningococcal A, B, C, W and Y. In recent years some of these meningococcal strains have increased across Australia.

Meningococcal ACWY-containing vaccine

The Meningococcal ACWY-containing vaccine is a four-in-one combined vaccine for protection against meningococcal A, C, W, Y strains. Studies have shown that the effectiveness of the meningococcal A, C, W, Y vaccine is between 80 to 85 per cent in adolescents. Meningococcal A, C, W, Y vaccination programs have been implemented in adolescents in the UK since 2015, and recommended in the US since 2005.

The vaccine does not contain any live bacteria and cannot cause meningococcal disease. The ACWY strain vaccine will boost adolescents with the C strain they had as a baby and protect against the A, W and Y strains.

Possible side effects of meningococcal ACWY vaccine

Most side effects are minor and quickly disappear. If the following reactions occur, it will be soon after vaccination.

Common side effects

- Mild temperature
- Headache
- Dizziness
- Pain, redness and swelling at the injection site
- Fainting may occur up to 30 minutes after any vaccination.

**Translating and
interpreting service**
Call 131 450

i M M U N I S E
AUSTRALIA PROGRAM
An Australian, State and Territory
Governments initiative

If mild reactions do occur, the side effects can be reduced by:

- Drinking extra fluids and not over-dressing if the person has a fever
- Taking paracetamol and placing a cold, wet cloth on the sore injection site.

Extremely rare side effects

- Severe allergic reaction.

In the event of a severe allergic reaction, immediate medical attention will be provided.

If reactions are severe or persistent, or if you are worried, contact your doctor or hospital.

Pre-immunisation checklist

Before your child is immunised, tell your doctor or nurse if any of the following apply.

- Is unwell on the day of immunisation (temperature over 38.5°C)
- Has any severe allergies
- Has had a severe reaction to any vaccine
- Is pregnant.

After vaccination wait at the place of vaccination a minimum of 15 minutes.

Further information

If you require further advice or information, please contact your local council immunisation service or local doctor.

Or visit www.betterhealth.vic.gov.au

How to complete the form

Please read the information.

Complete the form **even if the vaccine is not to be given.**

Detach the form and return it to school.

For all children/students

Please complete with the details of the child.

Then

Complete this section if you wish to have your child vaccinated.

Or

Complete this section if you do not wish to have your child vaccinated.

To receive this document in an accessible format email: immunisation@dhhs.vic.gov.au

<small>Privacy statement. The meningococcal ACWY vaccine program is a Commonwealth government funded vaccine program. Vaccines are administered by an immunisation nurse, employed by local council immunisation services, who visit each Victorian secondary school a number of times a year. Under the Public Health and Wellbeing Act 2008, local councils are responsible for coordinating and providing immunisation services to children being educated within the municipal district. Local councils are committed to protecting the privacy, confidentiality and security of personal information, in accordance with the Privacy and Data Protection Act 2014 and the Health Records Act 2001. Local councils report all adolescent vaccines given through school programs to the Australian Immunisation Register (AIR). Personal identifying details will be kept confidential. This will provide tools such as recall and reminder systems to improve adolescent vaccination rates. This is important to improve immunisation rates overall. Individuals will have access to their record of all vaccines recorded in the Australian Immunisation Register. Aggregate immunisation data may be disclosed to the Victorian government for the purpose of monitoring, funding and improving the Meningococcal ACWY Secondary School Vaccine Program. This information does not identify any individual. Information related to you or your child will be used or disclosed for purposes directly related to your child's immunisation, and in ways that you would reasonably expect. This may include the transfer or exchange of relevant information to your GP or your child's GP to another treating health service or hospital or another local council. The local council may provide you with information related to the school vaccine program via SMS or email. You can access your child's data by contacting the local council where your child attends school.</small>

Vaccine consent

Declaration: I am authorised to give consent or non-consent for my child to be vaccinated. I have read and I understand the information given to me about vaccination, including the risks of not being vaccinated and the side effects of the vaccine. I understand I can discuss the risks and benefits of vaccination with my local council or doctor. I understand that consent can be withdrawn at any time before vaccination takes place.

Complete for children aged under 18 (students aged 18 and over can give their own consent)

YES, I CONSENT to my child receiving the Meningococcal ACWY vaccine at school.

The Meningococcal vaccine is a four-in-one combined vaccine for protection against meningococcal A, C, W, Y strains (one injection).

Parent/guardian signature: _____ Date: / /

OR

No, I do not consent to my child receiving the Meningococcal W vaccine at this time.

OR

No, my child has had the Meningococcal ACWY vaccine elsewhere.

Please note any pre-existing medical condition, severe allergies or previous severe reaction to vaccination.

Privacy statement. The meningococcal ACWY vaccine program is a Commonwealth government funded vaccine program. Vaccines are administered by an immunisation nurse, employed by local council immunisation services, who visit each Victorian secondary school a number of times a year. Under the *Public Health and Wellbeing Act 2008*, local councils are responsible for coordinating and providing immunisation services to children being educated within the municipal district. Local councils are committed to protecting the privacy, confidentiality and security of personal information, in accordance with the *Privacy and Data Protection Act 2014* and the *Health Records Act 2001*.

Local councils report all adolescent vaccines given through school programs to the Australian Immunisation Register (AIR). Personal identifying details will be kept confidential. This will provide tools such as recall and reminder systems to improve adolescent vaccination rates. This is important to improve immunisation rates overall. Individuals will have access to their record of all vaccines recorded in the Australian Immunisation Register. Aggregate immunisation data may be disclosed to the Victorian government for the purpose of monitoring, funding and improving the Meningococcal ACWY Secondary School Vaccine Program. This information does not identify any individual. Information related to you or your child will be used or disclosed for purposes directly related to your child's immunisation, and in ways that you would reasonably expect. This may include the transfer or exchange of relevant information to your GP, to your child's GP, to another treating health service or hospital or another local council. The local council may provide you with information related to the school vaccine program via SMS or email. You can access your child's data by contacting the local council where your child attends school.
