| | Persons | 281 | 320 | 277 | 201 | 203 |
| Rate per 100,000 pop | Males | 76.7 | 88.3 | 89.3 | 56.6 | 52.2 |
| | Females | 157.4 | 194.4 | 141.9 | 109.7 | 115.9 |
| | Persons | 117.5 | 142.0 | 115.9 | 83.4 | 84.4 |

Source: Victorian Admitted Episodes Dataset (VAED). Public hospital admissions only

Notes: Hospital separations were classified using the ICD-10-AM, Editions 1 – 4.

Records relating to same-day separation, acute hospital transfer, and statistical discharge were excluded.

Rates were age standardised using the Australian Estimated Resident Population as at 30 June 2011.

Only admissions of people residing in Gippsland to Victorian public hospitals are included.

Disease codes using ICD-10-AM: X60-X84 (Principal and all secondary diagnosis)
